

## TABLE XVI.

## OCCUPATION OR MEANS OF LIVELIHOOD.

For the purpose of this table a scheme of classification, based on that of Monsieur Jacques Bertillon, has been adopted. All occupations are divided according to this scheme into four main classes, and are sub-divided into twelve sub-classes, fifty eight orders and one hundred and eighty one groups. Further explanation is given in Chapter XI of the Report Volume.

The table is divided into two principal parts, namely,—

- Part (I) General summary of occupations by main religions for the country as a whole and for the four principal towns, Jaffa, Tel Aviv, Jerusalem and Haifa.
- Part (II) The details of occupations for each administrative district and sub-district and for each of the four principal towns.

Each part of the table is divided into two sections, namely,—

- (a) that relating to the settled population ; and
- (b) that relating to the nomadic population.

It was not possible statistically to combine the results in one tabular manifold, because the question addressed to the settled population was not identical with that addressed to the nomadic population. Nevertheless, the nomadic population is engaged principally in agricultural and pastoral occupations which have been classified as nearly as possible on the lines of the Bertillon system. Those, who so desire, may easily combine the two sections of each part of the table, and no great error is involved in statistical examination of the results for the total population.

The column headed "Partly Agriculturists" gives the details of earners who derive their principal livelihood from one form of occupation, and who augment their means of subsistence by following, as a subsidiary occupation, one of the following agricultural pursuits :—

- Group* (1) Income from rent of agricultural land ;
- Group* (2) Ordinary cultivators ;
- Group* (5) Farm servants and field labourers and watchers.

Since persons returned as following a subsidiary agricultural occupation are enumerated as earners in the appropriate columns of the table, the numbers of persons returned as "Partly Agriculturists" are included in the several totals for the groups and are not additive horizontally. Thus, if there be a total of  $M$  earners in *Group P*, and  $N$  are shown as "Partly Agriculturists", the interpretation is :—

- "Of  $M$  earners following occupation  $P$ ,  $N$  are augmenting their livelihood by following subsidiary agricultural occupations, either :—
- " (i) as receivers of rent of agricultural land ; or
- " (ii) as ordinary cultivators ; or
- " (iii) as farm servants and field labourers and watchers."

**TABLE XVII**

---

**OCCUPATION OF WORKING DEPENDANTS.**

---

This table shows the occupations of working dependants of either sex by religion.

It is divided in two parts, the first part being a summary for the whole of Palestine, and the second part giving the details for districts.

The classification of occupations is identical with that used for Table XVI.

A working dependant is a person who, while supported by an earner having a principal occupation, follows an occupation which does not augment the family income. Thus a son is a working dependant who helps his father in the fields, and does not earn additional wages.

TABLE XVII.

Occupations of working dependants by age for males and civil condition for females.
