Induction Session for Computer Science Postgraduates
(GradDipComp and MComp, MComp(Adv))

Research School of Computer Science
ANU College of Engineering and Computer Science
16 July 2019

Welcome all new GDC, MComp and MComp(Adv) Students!

- overview of the GDC, MComp and MComp(Adv) programs
- overview of the Specializations
- support
- computing environment
- resources
- what to do next...
Overview of the Graduate Diploma in Computing

- as stated on P&C page, for upskilling of CS or non-CS graduates in minimum time

- suggested enrollment for S2 2019:
  - COMP6710 Structured Programming (S2)
  - COMP6250 Professional Practice 1 (S2)
  - computing electives (12u, S2)
  - MATH6005 Discrete Mathematical Models (S1)
  - COMP6442 Software Construction (S1)
  - computing electives (12u, S1)

- if seeking to follow up with MComp (need GPA $\geq 5$), can be granted a year of credit;
  suggest electives include:
  - COMP6240 (S2), COMP8260 (S1), COMP6340 (S1)
Overview of the Master of Computing

- as per P&C page: also for both CS and non-CS graduates
  - CS graduates should have obtained exemption/status for MATH6005 and COMP6710 (possibly also COMP6240 and COMP6331)

- latest study plans available here
  - note: COMP6260 Foundations of Computing is now an alternative for MATH6005 Discrete Mathematical models
  - these plans are NOT prescriptive! e.g. project over 1 semester can be done in either S1 or S2
  - these study plans spread electives throughout all semesters; alternately could aim to finish more core courses in first year

- an exemption for COMP6250 Professional Practice I may be obtained after passing diagnostic test in Week 1 (must first enrol and register to attend test)
Course Selection Issues in the Master of Computing

- core course choices (which semester, content, technical difficulty):
  - computational foundations: MATH6005 (S1) vs COMP6260 (S2)
  - databases: COMP6240 (S2) vs COMP6420 (S1)
  - networks: COMP6340 (S1) vs COMP6331 (S1)
  - software engineering: COMP6120 (S2) vs COMP8190 (S2, 2020)

- final year projects: COMP8715 (TechLauncher, 2 sems) or COMP8755 (individual, 1 or 2 sem) or COMP8830 (internship, 1 sem, must apply): details

- 5 CS electives: at least 2 must be COMP8000-level!

- (without credit or exemptions) care must be taken to complete a Specialization!

- can upgrade to MComp(Advanced) after 1 year with GPA $\geq 6$:
  including COMP8260, COMP6442 and 2 ‘Advanced’ courses in 1st-year electives as well; choose COMP6420 & COMP6331
Overview of the Master of Computing (Advanced)

• as per the P&C page, for CS graduates aiming for an industry R&D leadership role or a PhD pathway

• differences from the MComp:
  • no ‘introductory’ courses in the core (MATH6005, COMP6710, COMP6250)
  • has the more advanced database and networks courses
  • instead of COMP8110 Project Management and a 12u project, COMP6445 Computing Research Methods and 24u COMP8800 Research Project

• latest study plans available here

• a GPA of $\geq 6$ must be maintained in the 1st year (otherwise transferred to the MComp)
Postgraduate CS Specializations

- Artificial Intelligence (suggest take COMP6260 in S2 2019 to make room):
  
  **S1 2020:** COMP6262 Logic, COMP6320 AI
  **S2 2020:** COMP8620 Adv. AI, COMP8691 Optimisation or COMP8670 Adv. Logic

- Data Science:
  
  COMP6490 Document Analysis (S2), COMP8410 Data Mining (S1, 2020),
  COMP8430 Data Wrangling (S2, 2020) + 1 AI/ML course

- Machine Learning: can (possibly) start on COMP6490 and/or COMP6670 Intro. ML straight away! (S2)

- Human Centred Design and Software Development

  - considerations: interest, industry value, degree of technical difficulty

  - note: choosing a Specialization can have an impact of when you take your core courses
Support for Postgraduate CS Students

- **CS P/G Convenor**: Peter Strazdins, Peter.Strazdins@cs.anu.edu.au, CSIT N217, x55140
  for *academic advice*: advice on enrolment, program progression and variation
  When seeking a consultation: offer at least at least 3 timeslots that suit you, have your ISIS ‘Statement of Results’ ready, call to be let in

- **CECS Student Services**: studentadmin.cecs@anu.edu.au, CSIT N202, x54450
  for *administrative advice*: applying for exemption, overload, late enrollment, etc
  Note: for visa-specific matters, you must talk to your visa provider

- **Course Convenors**: for specific help (e.g. on assignments) on each course that you will enrol in, link to respective course web page from Current Postgraduate Students Courses page
CS Computing Environment

- first floor CSIT building has labs with Linux workstations (User Guide)
  Note: CSIT N111 is (mostly) reserved for postgraduate students

- can log in remotely via server partch, i.e. ssh u8914893@partch.anu.edu.au
  - on a Windows machine, you will need to install a Secure Shell client,
    e.g. by the Cygwin Linux emulation package, from http://www.cygwin.com

- CECS IT Support: helpdesk@cecs.anu.edu.au, CSIT N117 x54321#25
  for all technical support relating to the CS Linux labs

- you also have access to ANU IT services

- once enrolled, you will have an ANU email account
  (firstname.lastname@anu.edu.au or u999999@anu.edu.au)
  - only use this to contact RSCS/CECS/ANU staff! Quote your uni id!
  - ANU staff will contact you by it: please check it regularly!
Resources for Postgraduate CS Students

- Current Postgraduate Students web page
  - Useful links (Timetabling, Academic Skills & Learning, Counselling)
  - FAQs (Degree Plans and Enrolments, International Students, Resources)
  - Courses (semesters/years(!) offered, course web pages and convenors)
- from the corresponding undergraduate page,
  - CS Student Handbook: assessment issues
  - CS Computing Environment Handbook: guide to the CS Linux labs
  - Q&A forum, Resources (Course Information, Resources – study plans)
  - you will be automatically added to forum in week 1
  - or can self-enroll via https://piazza.com/anu.edu.au/spring2016/cs6000
What to do Now?

- decide on Specializations and electives (start now!)
  - study course P&C entries and web pages
  - if needed, contact course convenors for further information
- complete your enrollment on-line on ISIS (week 0)
  - any questions, go to the Academic Advisory Sessions (Ian Ross Seminar Room) on 16th & 17th
  - note: you can freely change your enrollment till end of week 2
- find out your lecture/tutorial times on the ANU timetable (week 0)
- register for your tutorials; for each course, either by StReaMs (https://cs.anu.edu.au/streams/) or Wattle (weeks 0–1, the earlier the better!)
- begin attending classes (week 1)
- have a great semester!
