Introduction

1.1 Section 1

Literature Review

We add a few blank pages here to illustrate section headings on odd pages (other than the first page in a new chapter).

Also, here is an example of a citation [Lamport 1994], and another one [Knuth 1986], and another [Goossens et al. 1994]. If in the context, it makes sense to talk about the work of an author in a more integrated way, like Lamport [1994], that can be done too. Because the information on this page is *so* important, it has been indexed too (see the index at the back of this thesis).¹

¹However, it is *strongly* advisable to leave indexing until the thesis is complete. Donald Knuth says to allow about a day for the task of indexing. In my experience he was spot-on.

Note the chapter name at the top of this even (lefthand) page...

Note the section heading at the top of this odd (righthand) page...
